

Job Description: Lead / Manager AI-ML Engineer

Position: Lead / Manager AI-ML Engineer

Experience: Minimum 8+ years

Location: Remote (Pan-India)

Employment Type: Full-Time

About the Role

We are seeking a highly skilled and experienced **AI/ML Engineer** with deep expertise in **Generative AI**, **Retrieval-Augmented Generation (RAG)**, and **Large Language Models (LLMs)** to lead our Machine Learning initiatives.

The ideal candidate will manage a team of talented data scientists and engineers, owning the **end-to-end AI/ML portfolio** of the organization. This role requires not only strong technical proficiency but also proven team leadership and project management experience.

Key Responsibilities

- **AI/ML Strategy & Leadership**
 - Define and execute the organization's AI/ML strategy and roadmap.
 - Lead and mentor a team of AI/ML engineers and data scientists.
 - Ensure best practices for model development, deployment, and scalability.
- **Technical Ownership**
 - Architect and implement advanced machine learning solutions, especially around **transformer-based architectures**.
 - Build and fine-tune **Large Language Models (LLMs)** for various business use cases.
 - Develop and optimize **RAG pipelines** for production-ready applications.
 - Collaborate with cross-functional teams (Product, Engineering, and Data) to translate business requirements into AI-driven solutions.
- **Innovation & Research**
 - Stay updated with cutting-edge AI research and integrate relevant advancements into the company's solutions.

- Explore and deploy frameworks like **Hugging Face Transformers**, **PyTorch**, and other modern ML toolkits.
 - **End-to-End Delivery**
 - Oversee the entire lifecycle of ML models—from problem framing, data preparation, and model training to deployment and performance monitoring.
-

Required Skills & Qualifications

- **Experience:** Minimum 8+ years of experience in AI/ML, with at least 3+ years in a leadership or managerial role.
 - Strong expertise in **Generative AI**, **RAG**, and **LLM fine-tuning**.
 - Hands-on proficiency with **Python**, **PyTorch**, and **transformer-based architectures**.
 - Deep understanding of **Hugging Face Transformers** and related frameworks.
 - Proven experience handling **end-to-end ML operations** in production.
 - Excellent leadership and communication skills, with the ability to manage and inspire a team.
 - Strong problem-solving mindset with a focus on innovation and scalability.
-

Preferred Skills

- Experience with **MLOps tools** and cloud platforms like AWS, Azure, or GCP.
 - Knowledge of **vector databases** and modern retrieval techniques.
 - Background in data science, analytics, and statistical modeling.
-

Why Join Us?

- Opportunity to **own the complete AI/ML portfolio** and shape the future of innovation within the organization.
- Work with cutting-edge technologies and contribute to **next-gen Generative AI solutions**.
- A fully **remote opportunity**, open to talented professionals across India.

- A collaborative and growth-focused culture that values innovation.
